

Summary of Day 1

*APEC ECSG Technical Assistance Seminar:
Domestic Implementation of the APEC
Privacy Framework*

*Hong Kong
1 June 2005*

Our response to low trust

Law

- General privacy laws, eg New Zealand, Japan, Korea, Hong Kong, Canada, Australia
- Sector specific, eg USA – HIPAA, GLB, COPPA, FCRA, Can Spam, Do-Not-Call etc
- APEC Data Privacy Framework

Technology

- Filters – spam, virus
- Encryption

Sub-optimize consumption & involvement

- Lie, don't disclose, half truths
- Reduce participation

But think before acting

- Always remember the speed of change
 - technology, political, commercial
- Privacy – build in now; not build on later
 - technology; legal; commercial
 - ‘Security & Privacy need not be traded off’
 - less costly; more effective
- Consult widely when designing & implementing law
 - balance, balance, balance
- The APEC Privacy Principles are an integrated, practical response
 - And remember Tony Lam’s summary

APEC Privacy Principles: Relationship
